"Open Means Never Having to Say You're Sorry" by Alan Levine on Flickr CC BY-SA

"Some rights reserved"

Creative Commons licenses are **free**, **easy-to-use** copyright licenses providing a simple, **standardized** way to give the public permission to **share and use** your creative work — on **conditions of your choice**. CC licenses let you easily change your copyright terms from the default of “all rights reserved” to “some rights reserved.”

**In a world with fair copyright laws,
Creative Commons would be
superfluous**

CC is ...

- 6 licenses + 2 public domain tools
- a simplification of copyright rules
- an organisation based on volunteer work by advocates and 'open' activists
- aiming to grow 'the commons'
- a patch for broken copyright
- in favour of copyright reform

CC is not ...

- an alternative for copyright
- a rightsholder organisation
- a search engine
- a law firm
- a bunch of crazy open access fundamentalists :)

4 building
blocks

BY

- You are free to:

- **Share** — copy and redistribute the material
in any medium or format
- **Adapt** — remix, transform, and build upon
the material
- for any purpose, **even commercially**

- Under the following terms:

- **Attribution** — You must give **appropriate credit**, provide a link to the license, and indicate if changes were made
- You may do so in any reasonable manner,
but not in any way that suggests the licensor
endorses you or your use.

SA (ShareAlike)

- Same conditions as CC BY, plus:
 - **ShareAlike** — If you remix, transform, or build upon the material, you must distribute your contributions under the **same license** as the original.

NC (Non Commercial)

- Same conditions as CC BY, plus:
 - **NonCommercial** — You may not use the material for **commercial** purposes

ND (No Derivatives)

- Same conditions as CC BY, plus:
 - **NoDerivatives** — If you **remix**, **transform**, or **build upon** the material, you may not distribute the modified material.

Legal Code

- juridical basis
- "version 4.0"
- created by CC Legal Team + input from communities worldwide
- available in your language
- universally applicable

The screenshot shows the Creative Commons Attribution 4.0 International license page. At the top, the Creative Commons logo is displayed next to the text "Attribution 4.0 International". Below the logo is a small globe icon. A detailed disclaimer follows, stating that Creative Commons is not a law firm and does not provide legal services or legal advice. It clarifies that distribution of Creative Commons public licenses does not create a lawyer-client or other relationship. Creative Commons makes its licenses and related information available on an "as-is" basis. Creative Commons gives no warranties regarding its licenses, any material licensed under their terms and conditions, or any related information. Creative Commons disclaims all liability for damages resulting from their use to the fullest extent possible.

Using Creative Commons Public Licenses

Creative Commons public licenses provide a standard set of terms and conditions that creators and other rights holders may use to share original works of authorship and other material subject to copyright and certain other rights specified in the public license below. The following considerations are for informational purposes only, are not exhaustive, and do not form part of our licenses.

Considerations for licensors: Our public licenses are intended for use by those authorized to give the public permission to use material in ways otherwise restricted by copyright and certain other rights. Our licenses are irrevocable. Licensees should read and understand the terms and conditions of the license they choose before applying it. Licensees should also secure all rights necessary before applying our licenses so that the public can reuse the material as expected. Licensees should clearly mark any material not subject to the license. This includes other CC-licensed material, or material used under an exception or limitation to copyright. [More considerations for licensors.](#)

Considerations for the public: By using one of our public licenses, a licensor grants the public permission to use the licensed material under specified terms and conditions. If the licensor's permission is not necessary for any reason—for example, because of any applicable exception or limitation to copyright—then that use is not regulated by the license. Our licenses grant only permissions under copyright and certain other rights that a licensor has authority to grant. Use of the licensed material may still be restricted for other reasons, including because others have copyright or other rights in the material. A licensor may make special requests, such as asking that all changes be marked or described. Although not required by our licenses, you are encouraged to respect those requests where reasonable. [More considerations for the public.](#)

Creative Commons Attribution 4.0 International Public License

By exercising the Licensed Rights (defined below), You accept and agree to be bound by the terms and conditions of this Creative Commons Attribution 4.0 International Public License ("Public License"). To the extent this Public License may be interpreted as a contract, You are granted the Licensed Rights in consideration of Your acceptance of these terms and conditions, and the Licensor grants You such rights in consideration of benefits the Licensor receives from making the Licensed Material available under these terms and conditions.

Section 1 – Definitions.

a. **Adapted Material** means material subject to Copyright and Similar Rights that is derived from or based upon the Licensed Material and in which the Licensed Material is translated, altered, arranged, transformed, or otherwise modified in a manner requiring permission under the Copyright and Similar Rights held by the Licensor. For purposes of this Public License, where the Licensed Material is a musical work, performance, or sound recording, Adapted Material is always produced where the Licensed Material is synched in timed relation with a moving image.

b. **Adapter's License** means the license You apply to Your Copyright and Similar Rights in Your contributions to Adapted Material in accordance with the terms and conditions of this Public License.

c. **Copyright and Similar Rights** means copyright and/or similar rights closely related to copyright including, without limitation, performance, broadcast, sound recording, and Sui Generis Database Rights, without regard to how the rights are labeled or categorized. For purposes of this Public License, the rights specified in Section 2(b)(1)(2) are not Copyright and Similar Rights.

d. **Effective Technological Measures** means those measures that, in the absence of proper authority, may not be circumvented under laws fulfilling obligations under Article 11 of the WIPO Copyright Treaty adopted on December 20, 1996, and/or similar international agreements.

e. **Exceptions and Limitations** means fair use, fair dealing, and/or any other exception or limitation to Copyright and Similar Rights that applies to Your use of the Licensed Material.

f. **Licensed Material** means the artistic or literary work, database, or other material to which the Licensor applied this Public License.

g. **Licensed Rights** means the rights granted to You subject to the terms and conditions of this Public License, which are limited to all Copyright and Similar Rights that apply to Your use of the Licensed Material and that the Licensor has authority to license.

Human Readable

- summary or 'deed'
- this is what you link to
- available in your language

 creative commons

Attribution 4.0 International (CC BY 4.0)

This is a human-readable summary of (and not a substitute for) the [license](#).

[Disclaimer](#)

You are free to:

Share — copy and redistribute the material in any medium or format

Adapt — remix, transform, and build upon the material

for any purpose, even commercially.

The licensor cannot revoke these freedoms as long as you follow the license terms.

Under the following terms:

 Attribution — You must give [appropriate credit](#), provide a link to the license, and [indicate if changes were made](#). You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use.

No additional restrictions — You may not apply legal terms or [technological measures](#) that legally restrict others from doing anything the license permits.

Notices:

You do not have to comply with the license for elements of the material in the public domain or where your use is permitted by an applicable [exception or limitation](#).

No warranties are given. The license may not give you all of the permissions necessary for your intended use. For example, other rights such as [publicity, privacy, or moral rights](#) may limit how you use the material.

Don't forget:

CC licenses are operative only when applied to material in which a copyright exists, and even then only when a particular use would otherwise not be permitted by copyright.

Bear in mind when licensing your work:

- Remember the license may not be revoked.
- Make sure the material is appropriate for CC licensing.
- Make sure the material is subject to copyright or similar rights
- Think about how you want the material to be used.
- Specify additional permissions,
- Specify attribution information

SH Cranium-17 injuries

The 52 fragments that comprise Cr-17 show clear postmortem fractures along their edges (Table 1, Figs 2 and 3) typical of a dry bone breakage pattern commonly found in fossils under diagenetic conditions. No evidence of carnivore manipulation, such as tooth marks, is present on this specimen [25]. On the left side of the frontal squama, this individual shows two sub-rectangular-shaped fractures, Trauma 1 (T1) and Trauma 2 (T2) (Fig 2).

Fig 2. Cranium 17 bone traumatic fractures. (A) Frontal view of Cranium 17 showing T1 (inferior) and T2 (superior); (B) Details showing the two similar notches (black) of the fracture outlines. Note that the orientation is different; (C) Detail of the notch in T1 under a microscope; (D) Endocranial view of T2 with delamination of the inner table (black). doi:10.1371/journal.pone.0126589.g002

Prehistoric skull with puncture wounds could be world's first murder mystery

Pieced together from 52 fragments found in cave in northern Spain, 430,000-year-old skull seems to show victim was bludgeoned to death

Workers at the Atapuerca archaeological site preparing to go down to the Sima de los Huesos in 2010. The site is home to a large number of early human remains. Photograph: AFP/Getty Images

Scientists have pieced together the world's earliest murder mystery, showing that an ancient human appears to have met their end after being bludgeoned to death and thrown down a cave shaft.

EEBO-TCP Phase I Public Release: What to expect on January 1

December 24, 2014 - Posted in News - [Permalink](#)

The Text Creation Partnership is quickly arriving at a major milestone: starting January 1, 2015, all restrictions will be lifted from EEBO-TCP Phase I, which consists of the first 25,000 texts transcribed and encoded by the TCP from 2000-2009.

These 25,000 (plus a few hundred) texts will be freely available to anyone wishing to use them, and there will no longer be any restrictions on sharing these files. They will be licensed under the Creative Commons Public Domain Dedication (CC0 1.0 Universal), which will be indicated in the header of each text.

But what does this news mean for users of the EEBO-TCP Phase I texts? [Readmore »](#)

What is the TCP?

The Text Creation Partnership creates standardized, accurate XML/SGML encoded electronic text editions of early print books. We transcribe and mark up the text from the millions of page images in ProQuest's Early English Books Online, Gale Cengage's Eighteenth Century Collections Online, and Readex's Evans Early American Imprints.

This work, and the resulting text files, are jointly funded and owned by more than 150 libraries worldwide. All of the TCP's work will be released in the public domain for anyone to use.

[Access the TCP Texts](#)

<http://www.textcreationpartnership.org/>

Implementation of the User will continue to function after an upgrade.

Use of Metadata, Previews and Content

10. All Metadata that are exposed through the Europeana API are published under the terms of the [Creative Commons CC0 1.0 Universal Public Domain Dedication](#) and can be freely re-used for any purpose.
11. The Europeana API also provides URLs pointing to Previews hosted on Europeana.eu (`edm:preview`) and to Content hosted by Europeana's data providers (`europeana:object`, `enclosure`, `edm:object` and `edm:isShownBy`). The files identified by these URLs do not fall under the scope of the [Creative Commons CC0 1.0 Universal Public Domain Dedication](#) and may only be used in accordance with the rights statements contained in the `europeana:rights edm:rights` record associated with the digital object (note that there are some uses such as embedding or linking that do not require permission in most jurisdictions). If there is no rights statement contained in the `europeana:rights edm:rights` field or if the `europeana:rights edm:rights` field is missing, the User shall assume that these Previews and Content may only be used in accordance with the applicable copyright laws, unless the website of the data provider gives different permissions relating to the Preview and/or Content.

Data from Archaeology for the People? Greek Archaeology and its Public: An Analysis of the Socio-Political and Economic Role of Archaeology in Greece

Authors: Anastasia Sakellariadi [✉](#)

Abstract

The interview transcripts and survey data in this dataset originate from an investigation of the role of archaeology in local communities in Greece today. The communities of Krenides (Kavala), Dispilio (Kastoria) and Delphi (Phokida) were used as case studies.

**If you make it clear from the start what
can be done with your work ...**

- access
- attribution
- re-use
- modification
- commercial use
- ...

**... others can access, share and build upon your work
without fear of violating your author rights.**

A Creative Commons license (or public domain tool) is **universally recognisable, juridically sound, easily applicable** and leaves the user in **no doubt about the intentions of the author.**

*"Licenses **remove uncertainty** by spelling out what may or may not be done with the licensed work. Science is both **interdisciplinary and international**, crossing disciplinary and jurisdictional boundaries, and since science builds upon existing work, it depends on being able to **reuse content**"*

Puneet Kishor, former Project Coordinator for Science and Data at CC, as quoted in

an interview with PLoS

Citing CC licensed content

a little common sense goes a long way!

- attribution (BY) is obligatory: name of the author and name of the work (if available)
- link to the original source
- mention if the work has been adapted
- state the license under which the material is available, and link to it
- when in doubt: contact the author

And make it easy for others to cite you ...

Citation: Sala N, Arsuaga JL, Pantoja-Pérez A, Pablos A, Martínez I, Quam RM, et al. (2015) Lethal Interpersonal Violence in the Middle Pleistocene. *PLoS ONE* 10(5): e0126589. doi:10.1371/journal.pone.0126589

Academic Editor: Christopher Bae, University of Hawaii at Manoa, UNITED STATES

Received: March 9, 2015; **Accepted:** April 6, 2015; **Published:** May 27, 2015

Copyright: © 2015 Sala et al. This is an open access article distributed under the terms of the [Creative Commons Attribution License](#), which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited

Data Availability: All relevant data are within the paper and its Supporting Information file.

Funding: This research was supported by the Ministerio de Economía y Competitividad of the government of Spain (Project Nos. CGL2012-38434-C03-01, 02 & 03). CT scanning was carried out in collaboration with the Laboratorio de la Evolución Humana at the Universidad de Burgos (Spain) with funding provided by the Junta de Castilla y León Project No. BU005A09. Fieldwork at the Atapuerca sites was funded by the Junta de Castilla y León and the Fundación Atapuerca. N.S and A.P.P. have received postdoctoral and predoctoral respectively grants from the Fundación Atapuerca. R.M.Q. has received financial support from Binghamton University (SUNY).

Competing interests: The authors have declared that no competing interests exist.

Using PLOS Content

No permission is required from the authors or the publishers to reuse or repurpose PLOS content provided the original article is cited. In most cases, appropriate attribution can be provided by simply citing the original article.

Example citation:

Kaltenbach LS et al. (2007) Huntington Interacting Proteins Are Genetic Modifiers of Neurodegeneration. *PLOS Genet* 3(5): e82. doi:10.1371/journal.pgen.0030082.

If the item you plan to reuse is not part of a published article (e.g., a featured issue image), then indicate the originator of the work, and the volume, issue, and date of the journal in which the item appeared.

For any reuse or redistribution of a work, you must also make clear the license terms under which the work was published.

Figures, Tables, and Images

Figures, tables, and images are published under the Creative Commons Attribution (CC BY) license.

Data

If any relevant accompanying data is submitted to repositories with stated licensing policies, the policies should not be more restrictive than CC BY.

Incorrect citation

Cooper-Hewitt's Collection Database, licensed under CC0 on Github

"In order to reduce any uncertainty about the 'legitimate uses' of this dataset, Cooper-Hewitt has licensed this release under a Creative Commons Zero (CC0) license. This license is the most permissive available and allows for all types of reuse"

You can use and reuse all elements in this dataset without worrying about attribution or other restrictions, as it is in the Public Domain

Example: Presentation

This slide appears at the end of Jane Park's presentation called "[Using the CC BY license, Workshop for 2013 OPEN Kick-off](#)" at Slideshare. This is a good example because:

Author? - Clearly specifies that Creative Commons is the party that should be credited, along with a request to link to creativecommons.org.

License? - The specific CC license is noted (CC BY) with a link provided.

Machine-readability? - Yes, because it was uploaded to [Slideshare](#), a slide-sharing platform that [supports CC licensing](#).

Other good stuff? - Jane made use of one of the free [CC_video_bumpers](#) to iconically illustrate the CC BY license. She also makes it clear that she will let you know when material is governed by terms different from the CC BY license ('Except otherwise noted..').

If you link to or embed the presentation on a web page, make sure that the license information is clearly displayed next to the file, with all the recommended information [below](#).
