A WORLD WHERE
KNOWLEDGE
creates POWER
FOR THE *MANY*,
NOT THE *FEW*

Open Knowledge Network

Open Knowledge is a [nonprofit organization](#) that promotes [open knowledge](#), including [open content](#) and [open data](#). It was founded on 24 May 2004 in [Cambridge](#), UK, and was named the Open Knowledge Foundation (OKF) until April 2014.

The screenshot shows the Open Knowledge Foundation website. At the top, there is a navigation menu with links for 'Get involved', 'Events', 'Projects', 'Services', 'News', 'Donate', 'About', and 'Contact'. Below the menu is the title 'The Global Open Knowledge Foundation Network' and a subtitle 'Connect with others in your region and around the world to campaign for open information and use it to empower individuals and communities'. There are three main content boxes: 'A Growing Network' (stating over 40 countries are working to open up data), 'Everyone Welcome' (stating anyone can join), and 'Community Resources' (pointing to resources for existing members). A world map is displayed below these boxes, with a 'support us' button in the top right corner.

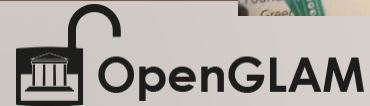

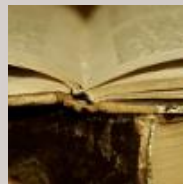

A world map with several countries highlighted in green, indicating the presence of local groups. The highlighted countries include the United Kingdom, France, Germany, Italy, Spain, Greece, and Egypt. A sidebar on the right provides details for the 'Local Group in Greece', including its status as a chapter, community leaders (Charalampos Bratsas and Marinos Papadopoulos), website (<http://gr.okfn.org>), mailing list ([Subscribe here!](#)), and Twitter handle (@OKFNgr). A list of topics is also provided, such as 'School of data', 'Open Government data', 'Open Science', 'Open Economics', 'OpenGLAM', 'Open Bibliography', and 'Open Education'.

Open Knowledge Foundation Local Groups around the world!

A horizontal banner featuring several logos and text elements. From left to right: 'OpenSpending' in green, a circular diagram with numbers, the 'ckan' logo, an icon of an open book, a photograph of an open book, the 'OpenGLAM' logo with a padlock icon, the text 'The PUBLIC DOMAIN REVIEW', three buttons labeled 'OPEN DATA', 'OPEN KNOWLEDGE', and 'OPEN CONTENT', and the 'School of Data' logo with the tagline 'evidence is power'.

59	Thailand											36%
61	Macedonia, the ...											35%

Countries / Greece

Country reviewer? [Log in here.](#)

This is the country overview page where you can see the state of open data across each key dataset (displayed down the left hand side). To find out more about each dataset, click on the info icon. Each icon in the data availability column represents important factors indicating data accessibility or availability - mouse over the icons to see what they are and the colours correspond to yes / no / unsure / no data.

Is something missing or is the data incorrect? Then please hit either 'submit information' or 'propose revisions' on the right and contribute more information. We need a correct direct link to the official source of the data - so make sure to include this! Click the link icon under Location to see the current entry.

Greyed out queued entries are submissions that are waiting approval by our editor team - but you can see the entry now and judge whether anything is missing.

Dataset	Data Availability	Location	Information

Η δημόσια διαβούλευση ολοκληρώθηκε.

Διαβούλευση - Public Consultation of the Greek Action Plan for the Open Government Partnership Initiative

Transition to Open Public Administration and Governance, which respects citizens, creates opportunities and brings out the new productive and development forces that the country needs, emerges as a cornerstone for the effective support of economy, social cohesion and development. Under the National Strategy for Open Public Administration and Governance, Greece participates in the International Cooperation Initiative for Open Governance (Open Government Partnership - OGP), which I actively follow, as the national representative (<http://www.opengovpartnership.org/countries/greece>).

The greek participation to the OGP is sealed with the drafting of the National Action Plan on Open Governance, which reflects our commitments to promote transparency, empower citizens, fight corruption, increase citizen engagement in all public administration levels and use of new technologies in modern governance. Pursuing effective participation of civil society in the process of addressing common challenges and implementation of all commitments undertaken by our country, we start the dialogue and set the new 2-year National Action Plan for Open Governance in public consultation from 6/5 to 26/05/2014.

Dialogue on Open Governance has commenced and it concerns us all! Given the importance of the Open Government Partnership initiative (<http://www.opengovpartnership.org/>), nationally and internationally, as it constitutes a unique opportunity for international recognition of our country, and at the same time an opportunity to adopt policies that will foster a relationship of trust between citizens and government, I urge you to participate actively in the public online consultation.

We make an open call to each and every one of you, Politicians, Scientists, Professionals, NGOs, Independent Authorities, Local Government, Public Bodies and Private Entities, stressing that it is important to submit suggestions, comments and feedback to ensure that all contribute to the effective implementation of the Greek Action Plan which will

As part of the Open Government Partnership Initiative, the Open Knowledge Foundation Greece (OKF Greece), recently participated in the open consultation of the "Greek Action Plan for Open Governance 2014 - 2016".

On Tuesday 27 May, OKF Greece held an open workshop to discuss and propose the positions and proposals of OKF Greece in the National Action Plan. The comments and suggestions made during the event are presented below, and have also been published on the official platform Opengov.gr - both in Greek and in English.

The workshop was attended by numerous volunteers, students and distinguished professors from Aristotle University of Thessaloniki and University of Macedonia, as well as a representative from the Municipality of Thessaloniki. The meeting was opened via Skype by Dr. Laura James - the CEO of the International Open Knowledge Foundation

Dr. James was followed by Dr. Charalampos Bratsas, president of the OKF Greece, who briefly presented the proposed Action plan before dividing all participants into four working groups. These groups then each explored four key actions of the Greek Action Plan for Open Governance 2014-2016.

A document containing all recommendations and proposals that emerged from ideas submitted during

... Open data is a very powerful lever for both a better economy and society. Open data is fuel for innovation, it is a tool for transparency, for better government and policy. At a time when many Greeks are looking for new sources of inspiration and hope, I am pleased to say that the Open Knowledge Foundation is one of those sources. I encourage all public bodies to support this effort. Whether the task is finding a job or spending tax money wisely, open data can help

Fiscal Transparency and Open Budgets are key instruments for the improvement of accountability and the reduction of corruption. For citizens it is very hard to get an overview of public spending. Currently information on budgets is mediated through journalists, civil society organizations, NGOs, and public administrations.

OpenBudgets aims to support journalists, civil society organizations, NGOs, public administrations by providing an overview of public spending. We also directly address citizens by creating an easy-to-use platform for publication, analysis, comparison and

OPEN TRIALS: OPEN KNOWLEDGE ANNOUNCE PLANS FOR OPEN, ONLINE DATABASE OF CLINICAL TRIALS

April 21, 2015 in [Featured](#), [open knowledge](#), [Open Trials](#)

Open Knowledge today announced plans to develop [Open Trials](#), an open, online database of information about the world's clinical research trials funded by The Laura and John Arnold Foundation. The project, which is designed to increase transparency and improve access to research, will be directed by [Dr. Ben Goldacre](#), an internationally known leader on clinical transparency.

OpenTrials

All the Data, on All the Trials, Linked

Open Trials will aggregate information from a wide variety of existing sources in order to provide a comprehensive picture of the data and documents related to all trials of medicines and other treatments around the world. Conducted in partnership with the Center for Open Science and supported by the Center's Open Science Framework, the project will also track whether essential information about clinical trials is transparent and publicly accessible so as to improve understanding of whether specific treatments are effective and safe.

"There have been numerous positive statements about the need for greater transparency on information about clinical trials, over many years, but it has been almost impossible to track and audit exactly what is missing," Dr. Goldacre, the project's Chief Investigator and a Senior Clinical Research Fellow in the Centre for Evidence Based Medicine at the University of Oxford, explained. "This project aims to draw together everything that is known around each clinical trial. The end product will provide valuable information for patients, doctors, researchers, and policymakers—not just on individual trials, but also on how whole sectors, researchers, companies, and funders are performing. It will show who is failing to share information appropriately, who is doing well, and how standards can be improved."

FOSTER

OpenTrials

All the Data, on All the Trials, Linked

Open Trials will aggregate information from a wide variety of existing sources, and aims to provide a comprehensive picture of the data and documents on all trials conducted on medicines and other treatments around the world.

Open Knowledge are working on this project with Ben Goldacre as Chief Investigator. Ben Goldacre is a Senior Clinical Research Fellow in the Centre for Evidence Based Medicine at the University of Oxford. Open Opportunities in Research

A novelty in Horizon 2020 is the Open Research Data Pilot

The Open Research Data Pilot applies to two types of data:

The data, including associated metadata, needed to validate the results presented in scientific publications as soon as possible;

Other data, including associated metadata, as specified and within the deadlines laid down in the data management plan.

For the 2014-2015 Work Programme, the areas of Horizon 2020 that participate in the Open Research Data Pilot are:

Future and Emerging Technologies

Science with and for Society

Research infrastructures – part e-Infrastructures

Leadership in enabling and industrial technologies – Information and Communication Technologies

Societal Challenge: 'Climate Action, Environment, Resource Efficiency and Raw materials' – except raw materials

Societal Challenge: 'Europe in a changing world – inclusive, innovative and reflective Societies'

Societal Challenge: 'Secure, Clean and Efficient Energy' – part Smart cities and communities

This corresponds to about €3 billion or 20% of the overall Horizon 2020 budget in 2014 and 2015.
